

Muhammad Talha

Full Stack Developer | MERN · Next.js · AWS · Docker

+92 312 0215244 | talhajoiyamuhammad@gmail.com | linkedin.com/in/muhammad-talha | github.com/MuhammadTalhajoiya

SUMMARY

Full Stack Developer proficient in JavaScript, React, Next.js, Node.js, Express, MongoDB, RESTful API design, and Generative AI integration (Google Gemini API), with hands-on experience deploying containerized applications on Amazon Web Services (AWS) using Docker, ECS, and ECR. Skilled in building production-grade AI-powered web applications, integrating large language model (LLM) APIs, and shipping features through effective collaboration and problem-solving. Final-year Computer Science student (Batch 2026) at Dawood University of Engineering & Technology. Seeking entry-level Full Stack Developer roles starting June 2026.

EDUCATION

Dawood University of Engineering and Technology

2022 – 2026 (expected June 2026)

Bachelor of Science in Computer Science

Karachi, Pakistan

Capstone: AI-Based Technical Recruitment Platform — automated hiring pipeline with video interviews deployed on AWS

EXPERIENCE

Software Engineer Intern

July 2025 – August 2025

8SolveAI

Karachi, Pakistan

- Delivered 3+ production features per sprint on a SaaS platform, accelerating release cycles by 40% through AI-assisted development using Claude Code and GitHub Copilot.
- Built React-based UI components and integrated RESTful APIs end-to-end across frontend and backend services.
- Participated in code reviews, daily stand-ups, and sprint planning following standard Git workflows and agile practices.

PROJECTS

AI-Powered Full Stack E-Commerce Web Application | React, Node.js, Express, MongoDB, Gemini API, OCR, JWT, Vercel, Railway 2025

- Built and shipped a production-grade MERN-stack e-commerce platform with product catalog, cart, JSON Web Token (JWT) authentication, role-based access control, and end-to-end checkout flow.
- Integrated Google Gemini API to power an AI Sales Analytics Dashboard with revenue charts and natural-language insights, plus an AI Business Assistant chatbot answering admin queries on live sales data.
- Engineered an AI Product Description Generator producing Search Engine Optimization (SEO)-friendly copy from product titles, and an AI Customer Support Helper drafting replies for refunds, shipping delays, and complaints.
- Implemented Invoice Optical Character Recognition (OCR) with AI summarization to extract vendor, amount, and category fields from uploaded invoice images.
- Deployed React frontend on Vercel and Node.js backend on Railway with managed MongoDB for scalable production hosting.

AI-Based Technical Recruitment Platform | React, Next.js, Node.js, Python, MongoDB, Docker, AWS

2025 – 2026

- Architected an end-to-end recruitment platform with a React and Next.js frontend that automates video and audio technical interviews.
- Engineered a resume parsing and scoring module evaluating candidates across 5 skill parameters in under 10 seconds.
- Reduced manual screening time by 60% and cut recruiter decision time by 50% through automated scoring.
- Containerized backend services with Docker and deployed on AWS for consistent environments across development and production.

CI/CD Pipeline for Three-Tier Web Application (Jenkins & AWS ECR) | Jenkins, Docker, Docker Compose, AWS ECR, GitHub Webhooks, EC2

2025

- Designed an automated Jenkins CI/CD pipeline that reduced manual deployment steps from 6 to 1, triggered on every GitHub push via webhook integration.
- Optimized multi-stage Docker image builds pushed to AWS ECR, cutting final image size by 40%.
- Secured AWS credentials through Jenkins Secrets Manager and orchestrated three-tier deployments using Docker Compose on Ubuntu EC2.

TECHNICAL SKILLS

Languages: JavaScript, Python, SQL, Bash, HTML/CSS

Frameworks: React.js, Next.js, Node.js, FastAPI, Python, Javascript, Express.js, Tailwind CSS

Databases: MongoDB, MySQL, Supabase

Cloud & DevOps: AWS (ECS, ECR, Fargate, EC2, IAM), Vercel, Railway, Docker, Docker Compose, Jenkins, GitHub Actions, CI/CD, Terraform

AI & Tools: Google Gemini API, Generative AI, LLM Integration, OCR, REST APIs, JWT, Git, GitHub, Linux, Postman, Agile, Scrum
